Pohár Gustava Kořinka

XVII. year of the international
Competition with the awarding
of degrees

CACIT, CACT, diviačiar.

ANTONSTAL

Významné lesnícke miesto - poľovnícky kaštieľ

2. - 4.12.2022 Nemšová

ÚZLPaR Antonstál is located in the Biele Karpaty mountains, in the district of Trenčín, in the local part of the town of Nemšová k.ú. Ľuborča near the border with the Czech Republic. The original name of the facility is Poľovnícky zámok Antonstál. The history of the castle is connected with the Brumov estate, which spread over the territory of Moravia and Považia from the 13th century. It changed several owners.

Under the Illešházys, the first organized forestry was established here. The stage of modern forestry began in 1835, when the estate was owned by Juraj Simon Sina. His granddaughter later sold the estate to one of the richest people in Austria-Hungary, the brewer Anton Dreher. Anton Dreher was fond of hunting and breeding wild game and deer. He built several menageries. In the years 1937 – 1943, his daughter-in-law Edeltruda Kulmerová Dreherová had the

Antonstál hunting lodge built according to the design of the architect Augustín Danielis in the Liborča zoo. In the fifties of the 20th century, the castle was confiscated by the Czechoslovak state and an apprenticeship school for woodcutters was established here. Odštepňý závod Trenčín is currently under the management of the state enterprise LESY Slovak Republic.

Putovní báseň k poháru Ing. Gustáva Kořínka.

Na pana Gustava Kořínka,
vybavuje se nám ne jenom v českých zemích hezká vzpomínka,
aj na Slovensku naň s úctou radi spomínáme,
je klenotom v dejinách kynológie, ktorý máme.

To co zasel, to vzešlo a plodně rozkvétá,
věříme, že rozkvétat to bude pořád, po léta,
lebo čo s láskou zasadíme do úrodnej zeme,
len s láskou môžeme dopestovať, to všetci dobre vieme.

Procitl v půvab alpského jezevčíkovitého brakýře,
ve kterém viděl jeho přednosti se srdcem rytíře,
alpský jazvečíkovitý durič pre neho mnoho znamenal,
svojou prácou, nadšením a umom ho vizionársky rozvíjal.

Ať Pohár Gustava Kořínka zůstane tradicí,
ať pořád je jako světýlko ze tmy zářící,
nech táto tradícia dobrých ľudí spája,
či už je to od Šumavy, od Beskýd a či od Dunaja.

ING. GUSTAV KOŘÍNEK

He was born on October 6, 1927 in Nova Bana in Slovakia, in the district of Žiar nad Hronom, where his family lived until 1939. Then they moved to Frýdek Místek. In the years 1945-1949, he graduated from the Secondary Forestry School in Hranice, and in the years 1950-1953, he graduated from the Faculty of Forestry in Brno. After his studies, he became the head of forestry in the Beskydy - Podolanky, from there he went to the Forestry Plant in Vítkov, where he worked until 1971. After 1971, he moved to the Frýdek Místek Forestry Project for political reasons. He worked until he was 62 years old and then retired to a well-deserved retirement. Among other things, he worked on hunting projects, related to the establishment of fields and pheasants

He always connected the work of a forester and hunter with hunting cynology, which accompanied him throughout his life. His father - a forester and a good hunter - led him to this from an early age. During his life he raised and showed many dogs in trials. In 1961, he founded the breeding station "from Vikštejn", from which he bred countless puppies. He became a judge of performance and exterior. He became the long-term chairman of the Club of Dachs breeders at the Slovak Hunting Association and, after a while, also a breeding advisor for the "dachshund" breed in Czechoslovakia.

This breeding founder, performance and exterior judge, organizer of club activities, successful breeder, forestry and hunting expert left us on September 4, 2018.

Honor to his memory!

Competition proposals

Honorary presidency

Ing. Tibor LEBOCKÝ PhD. - Prezident SPZ, SPK

PaedDr. Imrich ŠUBA PhD. - Riaditeľ kancelárie SPK

Ing. Jozef JURSA CSc. - Prezident SKJ

Organizational instructions

- Dachshund registered in the FCI studbooks will be admitted to the tests. A maximum of 13 individuals from Slovakia, the Czech Republic, Germany, Austria, Poland, Hungary, or other countries will take part in the exam. The drivers must come to the tests on time, in hunting gear, they must have a weapon suitable for hunting wild game, a hunting license, a firearms license and proof of the dog's origin. The driver must have the necessary aids for guiding and summoning the dog. During a joint hunt, each participant must be marked with a reflective vest in the drive and a reflective element at the station.
- GPS collars provided by the organizer will be used on the joint hunt.
- During the veterinary examination, it is necessary to present a veterinary certificate with a confirmed vaccination against rabies, distemper, parvovirus, and a confirmation of the infectious situation in the district and state from which the dog comes. Sick individuals and stray bitches are excluded from the tests. The driver will ensure the feeding of the individual himself.
- It is tested according to the valid test regulations for the tests of pipers in Slovakia. The organizer is not responsible for damage caused by the dog or for its loss.
- Exams are held in all weathers. The main referee and referees are delegated by SPK and they will be supplemented by referees from the countries where individuals will participate in the required number.
- The individual with the highest number of points in the 1st prize will receive the title of CACIT-waiting for the international labor champion and CACT-waiting for the Slovak labor champion. The runner-up in the first prize will receive the title R-CACIT and R-CACT. An individual who placed in the 1st prize, who has demonstrably and repeatedly worked intensively, preferably on wild game, can be awarded the title of gamekeeper.
- Part of the tests is a joint hunt for game and vermin. Transportation to the joint hunt will be provided. The hunt will take place on the territory of the ŠĽ district in the vicinity of Antonstál .
